PREDICT MARKET

MOOD AI

Feel The Market Before It Moves

Harness the power of AI to predict market
trends and stay ahead of the curve

INTRODUCTION

In the fast-paced world of cryptocurrency trading, emotions drive market movements. FUD can trigger panic selling, while FOMO leads to irrational buying sprees. Traditional technical analysis often fails to account for the psychological factors influencing price action.

MOOD AI is designed to bridge this gap. Powered by AI, neural networks, and machine learning, our service utilizes sentiment analysis and text classification to track, analyze, and interpret real-time market sentiment.

By leveraging a 355-million-parameter language model, MOOD AI enables traders, investors, and institutions to anticipate market shifts before they occur.
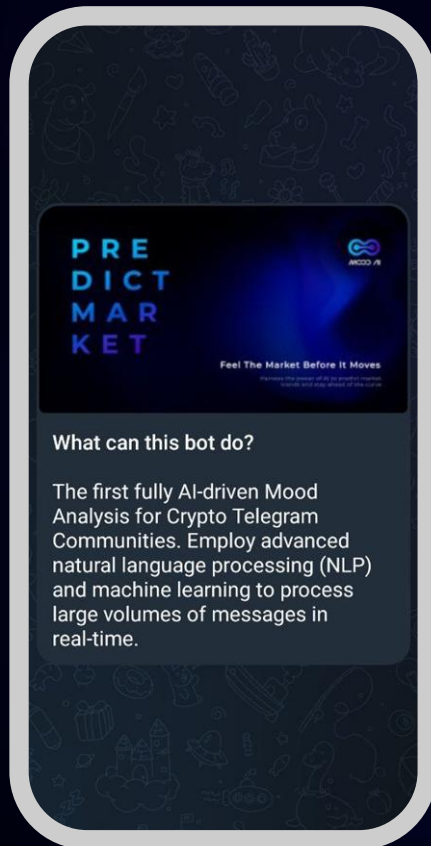

WHY MOOD MATTERS

Unlike traditional financial markets, the cryptocurrency industry is highly community-driven. Prices can skyrocket or collapse within hours based on community discussions, influencer opinions, and market narratives. While technical indicators like MACD, RSI or Fibonacci help identify entry and exit points, they do not capture the psychological undercurrents affecting price movements.

This is where sentiment analysis plays a crucial role:

☑ Anticipating Market Trends: Positive sentiment spikes often precede price rallies, while negative sentiment precedes downturns.

☑ Enhancing Trading Strategies: Sentiment-based trading signals can complement technical and fundamental analysis.

KEY FEATURES

The MOOD AI Agent gives users a strategic advantage, helping them stay ahead of market hype cycles, exit early from speculative bubbles, and make data-driven decisions.

☑ **Live Sentiment Tracking** across **Telegram** – the most impactful crypto community

☑ **Historical Sentiment Trends** to correlate emotions with market movements

☑ **AI-Powered Notifications** for sudden sentiment shifts

☑ **MiCA-Compliant Token Utility** ensuring a transparent and legal framework

TECHNOLOGY & AI

MOOD AI is built on state-of-the-art neural networks, employing text classification and sentiment analysis techniques to process vast amounts of unstructured data.

☑ Language Model: A 355-million-parameter deep learning model trained on financial and crypto-specific language patterns.

☑ Natural Language Processing: NLP analyzes Telegram messages to extract emotion-driven insights.

☑ Machine Learning Pipelines: Constantly refining sentiment predictions based on new market data.

☑ AI-powered Alerts: Deploys automated alerts to enhance trading decision making procedures.

UTILITY TOKEN

The $MOOD utility token is at the core of the ecosystem, ensuring access to premium features while driving adoption and demand. Holding $MOOD provides a long-term incentive for users, while those who prefer flexibility can opt for a monthly subscription model.

- ☑ Network: Ethereum
- ☑ Type: Utility Token
- ☑ Name: MOOD AI
- ☑ Ticker: $MOOD
- ☑ Buy Tax / Sell Tax: 5% / 5%
- ☑ Total Supply: 100.000.000

MiCA COMPLIANCE

MOOD AI ensures that $MOOD operates fully within MiCA (Markets in Crypto-Assets Regulation) guidelines, making it a utility token with clear platform-specific functionality.

☑ Platform Access: $MOOD tokens serve as a key to unlock premium features but are not financial instruments or investment vehicles.

☑ Alternative Subscription Model: Users can choose between holding $MOOD or paying monthly in $MOOD or ETH, ensuring regulatory compliance and accessibility.

☑ No Speculative Promises: $MOOD is not designed for financial gain or speculation, avoiding classification as an e-money token or asset-referenced token under MiCA.

FREEMIUM MODEL

MOOD AI offers a FREE TIER for all users, providing basic access to sentiment tracking. In this tier, users can subscribe to 1 token and access 1 day of historical sentiment data.

For advanced users, two premium TIERs provide extended access:

☑ TIER 1: Unlocks up to 3 token subscriptions and extends historical sentiment access to 3 days. Users can access this tier by either holding a required amount of $MOOD tokens or paying a monthly subscription in $MOOD.

☑ TIER 2: Designed for power users, this tier allows tracking of 10 tokens with historical sentiment data going back 5 days. Similar to Tier 1, access is granted through holding $MOOD tokens or paying a monthly subscription in $MOOD.
